Safety Leadership Training & Consulting

- > change safety culture
- > influence safety behaviours
- > increase productivity

The Safety Leadership Workshop provides leaders with powerful tools to achieve significant and sustained cultural change in their organisation. This interactive and confronting program will challenge leaders' safety attitudes and thinking and empower them to make a change in the way they think about and lead safety.

The workshop will allow participants to:

- > understand the costs of workplace incidents
- > experience the effects of permanent disability
- > build powerful safety leadership behaviours and know how these behaviours can influence behavioural and cultural change
- > understand incident causation theory and human error models
- > develop a Personal Safety Leadership Plan
- > control at risk behaviours and reinforce safe behaviours
- > explore how safety attitudes and thinking influence behaviours
- > create an effective and sustained safety culture by visualising desired safety culture and effectively selling the safety message
- > develop safety communication skills
- > learn how the world's best organisations are leading safety

This program is highly interactive, includes a number of practical activities and incorporates adult learning principles. The workshop is offered both in-house and on our public schedule.

Look after your employees & your bottom line by contacting CCIQ on 1300 138 470 to book your Safety Leadership Workshop today.
